ODD Report

Cordova Union Industrial Joint Venture

Real Estate — Industrial | Australian Unit Trust | Pre-Launch

February 2024

Review Type: Initial (Pre-Launch)

Table of Contents

Overview

Manager Overview

Cordova Property Partners Pty Limited ("Cordova", the "Manager") reported assets under management of A$4.25 billion as at September 30, 2023. The Manager operates a real estate strategy across core, value-add, and development activities. Cordova has 39 employees and maintains its sole office in Sydney, Australia.

Fund Overview

Cordova Union Industrial Joint Venture (the "Fund") had not been legally formed at the time of Alpine's review in February 2024. The Fund is a custom fund-of-one mandate for United Employees Superannuation Pty Ltd ("UNITE"). The Fund is expected to close in March 2024 with A$500 million from UNITE and will invest in industrial real estate across Australia under a core plus / value-add / develop-to-core strategy.

Controls Overview

The Fund is expected to be self-administered. Guardian Trust Limited ("Guardian") has been engaged as custodian and will hold title to all assets and control all asset transfers. The expected auditor is Thornton Blackwell LLP. Sterling Realty Services ("Sterling") is engaged as property manager, using the MRI accounting system. Valuations are produced quarterly by independent external valuation agents with mandatory rotation every three years per asset.

Strengths

• Guardian Trust Limited ("Guardian", the "Custodian") holds title to all assets and controls all asset transfers, providing robust segregation of duties over asset custody.

• External valuation agents are appointed for every property from a panel of major international and domestic firms, with mandatory rotation every three years per asset.

• UNITE (REST) retains direct involvement in the investment process, including veto rights over all proposed investments via a staged approval process (IIM, PIM, FIM).

• Dual signature from two Executive Directors required for all wire instructions before submission to the Custodian.

• Experienced management team with four co-founders and over a decade of institutional real estate investment experience in Australia.

Risks

• Cybersecurity controls underdeveloped: no formal policy, incident response plan, employee training, endpoint DLP, or multi-factor authentication at the time of review.

• Fund not legally formed; trust deed and IMA not prepared; auditor and banking counterparty not formally appointed.

• Self-administered with no independent third party administrator.

• No formal valuation committee established.

• Compliance gaps: no attestation/recertification, no personal trading monitoring, no restricted list, no dedicated CCO.

• Affiliate services (Cordova Asset Management Pty Ltd) charged through to the Fund.

• Employees related to principals and non-executive board members are employed within the firm.

Assessment

Overall Assessment: Green (Accept)

Cordova Property Partners Pty Limited ("Cordova", the "Manager") serves as Manager and maintains its sole office in Sydney, Australia. The firm was founded in 2010 by four co-founders: David Karras (Executive Director), Marcus Flynn (Executive Director), James Maguire (Executive Director, Finance & Operations / CCO), and Simon Elliot (former Executive Director). Cordova has been registered with the Australian Securities and Investments Commission ("ASIC") since August 15, 2010. As at September 30, 2023, the Manager reported assets under management ("AUM") of A$4.25 billion.

Cordova Union Industrial Joint Venture (the "Fund") had not been legally formed at the time of Alpine's review in February 2024. The Fund is expected to be structured as an unregistered unit trust and established as a custom fund-of-one mandate for UNITE (REST). The Fund is expected to close in March 2024 with an initial commitment of A$500 million. The investment strategy targets industrial real estate across Australia, with a primary focus on the Eastern seaboard, under a core plus, value-add, and develop-to-core mandate. The Fund expects to acquire 20 to 30 properties when fully invested, with annual investment pacing of A$150 to A$250 million in equity.

As Alpine's primary due diligence observation, Alpine highlights that Cordova did not have a cybersecurity policy in place at the time of this review. The Manager indicated that a cybersecurity policy was being drafted and expected to be completed by the end of Q1 2024. Alpine considers this a material deficiency in the Manager's operational control environment. In addition, the Manager does not maintain a formal incident response plan specific to cyber events, does not conduct employee cybersecurity training, has not implemented a data loss prevention solution for endpoint devices, and does not require multi-factor authentication for remote access. Given the increasing frequency and severity of cyber threats, Alpine strongly recommends that the Manager implement a comprehensive cybersecurity framework prior to the Fund's commencement of operations. These observations collectively drive a Red rating for *Technology, Cybersecurity & Business Resilience*. Investors should require written confirmation that the cybersecurity policy, incident response plan, employee training program, and multi-factor authentication have been implemented prior to committing capital to the Fund.

Separately, Alpine highlights that the Fund had not been legally formed at the time of this review. The trust deed had not been executed and the Investment Management Agreement ("IMA") had not been prepared. In addition, the Fund's expected auditor, Thornton Blackwell LLP ("Thornton Blackwell"), had not been formally engaged, and banking arrangements with a major Australian financial institution had not been confirmed. Alpine strongly recommends that investors require the execution of all key legal documentation and the formal appointment of the auditor and banking counterparty prior to committing capital. These observations contribute to a Yellow rating for *Fund Structure, Terms & Investor Alignment*.

Alpine also highlights certain compliance deficiencies. The Manager does not require staff to attest to the compliance manual upon joining the firm and does not conduct annual recertification. Personal trading is not subject to pre-clearance or minimum holding periods, employee brokerage statements are not received by compliance, and the firm does not maintain a restricted list. Furthermore, the Manager does not have a dedicated Chief Compliance Officer; the CCO function is held by James Maguire in conjunction with his role as Executive Director, Finance & Operations. The firm has not appointed an external compliance consultant and has never been subject to inspection by ASIC. These observations drive a Yellow rating for *Legal, Regulatory & Compliance*.

With respect to the Fund's control environment, Alpine notes that Guardian Trust Limited ("Guardian", the "Custodian") has been engaged to hold title to all assets and control all asset transfers. This arrangement provides a robust level of independent oversight and segregation of duties over the custody of the Fund's assets, which partially mitigates the absence of an independent administrator. Wire instructions require dual signature from two Executive Directors before submission to the Custodian, and a verification callback procedure is in place for third party wires above a materiality threshold. However, Alpine notes that new payment instructions are not subject to verification callback, which Alpine considers a deficiency.

Alpine further notes that external valuation agents are appointed for every property from a panel of major international and domestic firms. Agents are subject to mandatory rotation, with a maximum engagement of three consecutive years per asset. Independent valuations are obtained upon acquisition, quarterly after stabilization (one long-form and three short-form valuations per annum), and at least annually prior to June 30 for development assets. In addition, ground-up developments are independently valued within three months of completion. Where the Manager's quarterly review of carrying value indicates a difference of greater than 5% from the most recent independent valuation, an interim independent valuation is triggered. Alpine considers this valuation framework to be robust. Nonetheless, Alpine notes that the Manager has not established a formal valuation committee and recommends doing so as a matter of best practice.

UNITE (REST) retains direct involvement in the investment process. For proposed investments with equity of A$50 million or less, the Manager submits an Initial Investment Memorandum ("IIM") and REST has five business days to confirm or exercise its veto. For investments above A$50 million, a Preliminary Investment Memorandum ("PIM") is submitted and REST has eight business days to approve or veto. Following the completion of full due diligence, a Final Investment Memorandum ("FIM") is submitted and REST has five business days to confirm. Alpine considers REST's direct veto rights over all proposed investments to be a meaningful governance control for the Fund.

Alpine notes that Cordova Asset Management Pty Ltd, an affiliate of the Manager, provides asset management, development management, and leasing services, with fees charged through to the funds. While this arrangement is disclosed and the fees are subject to the terms of the mandate, Alpine highlights that investors should monitor the quantum and nature of affiliate fees charged to the Fund on an ongoing basis.

On balance, while Cordova could usefully benefit from material enhancements to its cybersecurity framework and certain improvements to its compliance environment, the Manager's resources, policies, and procedures — particularly the strength of the custodial arrangement with Guardian, the robust external valuation framework, and REST's direct involvement in the investment process — provide a sufficient level of control to limit operational risk. Alpine has therefore provided a Green (Accept) overall assessment, subject to the remediation items set out below. Alpine notes that this rating is based on current assertions at the time of the due diligence review in light of the fact that the Fund had not been legally formed; any changes to the represented service providers or expected procedures could affect the rating.

Pre-Launch Note: This assessment is based on the Manager's assertions at the time of this review considering the Fund has not been legally formed and service providers have not been fully engaged. Any changes in these areas might affect our rating.

Scope & Verification

Scope of Review

Alpine's review included discussions with Cordova's senior management team, a review of the draft term sheet for the Fund, the Manager's compliance manual and valuation policy, CREP's audited financial statements, the GS 007 report prepared by Thornton Blackwell on Sterling Realty Services' IT controls over the MRI accounting system, and independent checks against the Australian Business Register, ASIC registers, and other public databases. Alpine also conducted independent verification with Guardian Trust Limited (the expected Custodian) and Luminar IT Solutions Pty Limited (the IT consultant).

Independent Verification Performed

Verification	Result	Evidence Basis
Management Company	Confirmed	Alpine direct check, Australian Business Register
ASIC Registration	Confirmed	Alpine direct check, ASIC register (registered since August 15, 2010)
Technology Consultant (Luminar IT Solutions)	Confirmed	Luminar confirmed via email on February 14, 2024 that it serves as IT consultant to the firm
Administrator	Exception	Fund will not appoint an independent administrator (self-administered)
Auditor (Thornton Blackwell)	Exception	Auditor not yet formally appointed; unable to independently confirm engagement
Custodian (Guardian Trust Limited)	Confirmed	Guardian confirmed via email on February 15, 2024 that it is expected to serve as Custodian to the Fund

Chapter 1

Manager, Ownership & Governance

GREEN

Chapter 1: Manager, Ownership & Governance

Management Company and Affiliates

Cordova Property Partners Pty Limited ("Cordova", the "Manager") serves as Manager and maintains its sole office in Sydney, Australia. The firm was founded in 2010 by four co-founders: David Karras (Executive Director), Marcus Flynn (Executive Director), James Maguire (Executive Director, Finance & Operations / CCO), and Simon Elliot (former Executive Director). Cordova has been registered with the Australian Securities and Investments Commission ("ASIC") since August 15, 2010.

Cordova Asset Management Pty Ltd is an affiliate of the Manager that provides asset management, development management, and leasing services to the Manager's funds. Fees for such services are charged through to the underlying funds.

The Manager indicated that it is in the process of opening a second office in Melbourne to support its growing presence in the Victorian market. Maya Pham (Director, Melbourne Real Estate) has been based in Melbourne since July 2022, initially working from home as a result of COVID-19 restrictions. Alpine understands that the Melbourne office is expected to be a modest operation initially. Investors are encouraged to monitor developments in this area.

Assets under Management

Cordova reported assets under management ("AUM") of A$4.25 billion as at September 30, 2023. Alpine defines AUM as net asset value ("NAV") excluding uncommitted capital.

The Manager operates across several investment strategies, including industrial, office, warehouse retail, residential, and specialist real estate. The Manager's flagship product is the Cordova Real Estate Equity Partnership ("CREP"), which comprises three pooled vintages. In addition, the Manager has established CREP 4 as a single-investor mandate with a commitment of A$99 million, which was capped in Q1 2024. The Manager also operates SMAs and fund-of-one mandates for institutional investors.

Insider Investment

The Manager did not disclose the quantum of insider capital invested across its products. Alpine considers this a limitation in the due diligence process and highlights that transparency over insider capital commitments is a key indicator of alignment of interest between management and external investors. Alpine understands, however, that insider capital is contributed entirely in cash and represents a significant portion of the liquid net worth of the firm's principals. Investors are encouraged to request disclosure of insider capital commitments on an ongoing basis.

Ownership & Succession

The firm's ownership is distributed among its co-founders and the Ferraro family. David Karras, Marcus Flynn, and James Maguire each hold 18.5% of the firm. Simon Elliot, who announced his retirement in 2022, retains a 4.5% ownership stake and continues in a strategic advisory role. The remaining 40% is held by Robert and Paul Ferraro via Ferraro Holdings Pty Ltd. Robert and Paul Ferraro occupy non-executive positions on the Board and are not involved in day-to-day operations or investment decisions.

Alpine notes that the Ferraro family provided seed capital for the first two CREP vintages: A$25 million for CREP 1 and A$26.2 million for CREP 2. While the seed investor relationship is disclosed and the Ferraro family is not involved in operations or investment decisions, Alpine highlights that the arrangement introduces a governance dynamic that investors should monitor. Investors are encouraged to seek clarity on the terms of the Ferraro Holdings arrangement and any rights or preferences associated with their ownership stake.

The Manager has not established a formal succession plan. Given the reliance on the three active Executive Directors and the retirement of Simon Elliot, Alpine would prefer to see a formal succession plan documented in writing. In partial mitigation, Alpine notes that the firm has a relatively deep bench of senior professionals across its investment, asset management, and development functions.

Human Resources

As at September 30, 2023, Cordova had a total headcount of 39, with plans to continue growing its team in support of the Melbourne office and expanded mandates.

With respect to notable departures over the past two years, the Manager stated that Lucas Mitchell (Senior Investment Manager) and Chris Sullivan (Development Manager) both departed due to relocation, Patricia Lowe (Finance Manager) departed for another career opportunity, and Ben Torres (Capital Transaction Manager) also departed for another career opportunity. The Manager confirmed that all departures were amicable with no ensuing litigation. In addition, Simon Elliot (Executive Director, co-founder) announced his retirement in 2022 and transitioned to a strategic advisory role, retaining a 4.5% ownership interest.

Conversely, the firm hired 15 additional staff over the past two years across back office, investment, asset management, development, and ESG functions.

The Manager engages an HR consultant on retainer and a marketing consultant on an ad hoc basis. The firm also employs part-time staff who work three to four days per week. Background checks are conducted on all new hires by VerifyPlus, covering references, education, and criminal records. Credit checks are performed on key individuals and finance staff. The Manager confirmed that no subsequent checks are conducted after the initial hire. Alpine would prefer to see periodic re-screening of key personnel, particularly those with access to financial systems and sensitive data.

Staff are compensated with a base salary and a short-term incentive ("STI") of 40% to 80% of base salary, payable 100% in cash. Members of the Leadership Group are also eligible for a long-term incentive ("LTI") equivalent to 20% to 30% of relevant performance fees, deferred for three years.

Alpine notes that Thomas Flynn (Assistant Development Manager) is the son of Marcus Flynn (Executive Director), and Nick Ferraro (Development Manager) is the son of Robert Ferraro, a non-executive board member and principal of Ferraro Holdings. While family relationships within the firm are not inherently problematic, Alpine highlights that such arrangements can give rise to governance and conflict of interest considerations. Investors should be aware of these relationships.

Chapter Summary

GREEN

Overall, no material diligence issues were identified at the management company level, which supports a Green rating for *Manager, Ownership & Governance*. The Manager has an established track record in Australian real estate spanning more than a decade, a diversified ownership structure among its co-founders, and a growing team. Nonetheless, Alpine highlights the absence of a formal succession plan, the non-disclosure of insider capital, the Ferraro Holdings seed investor arrangement, and the presence of family relationships within the firm.

ALPINE

Chapter 2

Legal, Regulatory & Compliance

YELLOW

Chapter 2: Legal, Regulatory & Compliance

Regulatory Oversight

Cordova has been registered with the Australian Securities and Investments Commission ("ASIC") since August 15, 2010. The Manager confirmed that it has never been subject to an inspection by ASIC. While the absence of a regulatory inspection is not unusual for a firm of Cordova's size and registration type, Alpine notes that investors cannot rely on any independent regulatory assessment of the Manager's compliance environment.

Compliance Infrastructure and Policies

Alpine highlights that Cordova does not have a dedicated Chief Compliance Officer. The CCO function is held by James Maguire (Executive Director, Finance & Operations) in addition to his operational responsibilities. While James is a co-founder with extensive knowledge of the firm's operations, Alpine would prefer to see a dedicated CCO who is independent from the firm's business activities. In partial mitigation, James is not a member of the Investment Committee in his capacity as CCO and his compliance responsibilities are separate from his investment functions.

The Manager has not appointed an external compliance consultant. Alpine would prefer for the firm to engage a third party compliance consultant to supplement its internal compliance function, particularly given the absence of a dedicated CCO and the fact that the firm has never been subject to regulatory inspection.

The firm has a written compliance manual which was provided to Alpine for review. However, Alpine notes that the Manager does not require staff to attest to the compliance manual upon joining the firm, nor does it conduct annual recertification. Alpine considers staff attestation and annual recertification to be fundamental compliance controls and would strongly recommend their implementation.

Personal Trading

The Manager does not monitor personal trading activity. Personal trading is not subject to pre-clearance or minimum holding periods, and employee brokerage statements are not received by compliance. The firm does not maintain a restricted list. Alpine considers these to be material deficiencies in the Manager's compliance framework and would strongly recommend the implementation of a personal trading monitoring program, including pre-clearance requirements, minimum holding periods, receipt of brokerage statements, and maintenance of a restricted list.

External Directorships

The Manager confirmed that certain principals hold external directorship positions. Alpine highlights that external directorships can give rise to conflicts of interest and that the firm should maintain a register of all external directorships and monitor them on an ongoing basis.

Claims, Actions, and Conflicts

The Manager represented that a pending litigation matter exists involving the firm or its affiliates. Alpine was provided with information regarding the nature of the matter, which relates to a dispute with a former counterparty. The Manager indicated that the matter is being managed by external counsel and is not expected to have a material impact on the firm's operations or financial position. Alpine recommends that investors monitor the progress of this matter.

Separately, the Manager confirmed that an Australian Taxation Office ("ATO") dispute was resolved with no adverse finding against the firm.

Chapter Summary

YELLOW

While Cordova has established a baseline level of controls over its compliance environment, Alpine highlights several deficiencies: the absence of staff attestation and annual recertification for the compliance manual; no personal trading monitoring, pre-clearance, or restricted list; the lack of a dedicated CCO; the absence of a compliance consultant; and the fact that the firm has never been subject to regulatory inspection by ASIC. These observations collectively drive a Yellow rating for *Legal, Regulatory & Compliance*.

ALPINE

Chapter 3

Technology, Cybersecurity & Business Resilience

RED

Chapter 3: Technology, Cybersecurity & Business Resilience

IT Overview

IT functions have been outsourced to Luminar IT Solutions Pty Limited ("Luminar"). Luminar provides managed IT services to the firm, including infrastructure management, helpdesk support, and technology consulting. Alpine confirmed Luminar's engagement via email on February 14, 2024.

Cybersecurity Controls

Alpine highlights that Cordova did not have a cybersecurity policy in place at the time of this review. The Manager indicated that a cybersecurity policy was being drafted and expected to be completed by the end of Q1 2024. Alpine considers the absence of a formal cybersecurity policy to be a material deficiency in the Manager's control environment.

In addition, the Manager does not maintain a formal incident response plan specific to cyber events. Alpine would strongly recommend the development of a detailed incident response plan that addresses identification, containment, eradication, recovery, and post-incident review procedures.

The Manager does not conduct employee cybersecurity training. Alpine considers annual cybersecurity training, including phishing simulations, to be a baseline requirement for institutional investment managers.

The firm has not implemented a data loss prevention solution for endpoint devices. Alpine would prefer for the firm to implement a complete endpoint DLP solution to prevent sensitive data from being transferred outside the firm's network.

The Manager does not require multi-factor authentication ("MFA") for remote access. Alpine considers MFA to be a fundamental cybersecurity control and would strongly recommend its implementation prior to the Fund's commencement of operations.

Business Continuity

The Manager has a written business continuity plan ("BCP") which was provided to Alpine for review. Alpine understands that the BCP is tested annually. However, Alpine notes that certain elements of the BCP could be enhanced, particularly in light of the cybersecurity deficiencies noted above.

Chapter Summary

RED

The Manager did not have a cybersecurity policy in place at the time of this review. In addition, the firm does not maintain a formal incident response plan, does not conduct employee cybersecurity training, has not implemented an endpoint DLP solution, and does not require multi-factor authentication for remote access. These deficiencies collectively drive a Red rating for *Technology, Cybersecurity & Business Resilience*. Alpine considers the implementation of a comprehensive cybersecurity framework to be a pre-condition for the Fund's commencement of operations.

ALPINE

Chapter 4

Fund Structure, Terms & Investor Alignment

YELLOW

Chapter 4: Fund Structure, Terms & Investor Alignment

Legal Structure

Cordova Union Industrial Joint Venture (the "Fund") had not been legally formed at the time of Alpine's review in February 2024. The Fund is expected to be structured as an unregistered unit trust under Australian law. The trust deed had not been executed and the Investment Management Agreement ("IMA") between Cordova and UNITE had not been prepared.

The Fund is expected to establish sub-trusts to hold individual properties or groups of properties. While sub-trusts are a common structural feature in Australian real estate investment vehicles, Alpine notes that the use of sub-trusts adds complexity to the Fund's accounting and operational infrastructure.

Alpine strongly recommends that investors require the execution of all key legal documentation, including the trust deed and IMA, prior to committing capital to the Fund.

Key Terms

The Fund is expected to offer units denominated in Australian Dollars ("AUD"). The term sheet was still in draft form at the time of this review.

Under the draft term sheet, the Manager or Asset Manager may be removed for cause or without cause (subject to six months' notice and payment of outstanding fees and any performance fee). The Manager can only be terminated without cause after the fifth anniversary of the Fund's establishment. REST may elect to exercise a "Convert-to-Core" option at the Deemed Realisation Event, which occurs between the fifth and seventh anniversaries. Under the Convert-to-Core arrangement, the Fund would transition to a core holding structure with an adjusted property operating servicing fee of 30 basis points on NAV, with no ongoing management or performance fee.

Fee Structure

The Fund charges a management fee of 0.25% per annum on allocated capital. A property operating servicing fee of 0.60% per annum on allocated capital is charged to cover affiliate services provided by Cordova Asset Management Pty Ltd, including asset management, development management, and leasing services. The performance fee is 15% of the amount by which total return exceeds a benchmark return of 9.5% per annum, calculated at the Deemed Realisation Event (between the fifth and seventh anniversaries).

Development management fees are charged at 3% of total project costs for ground-up development and 5% for asset refurbishing, repositioning, or significant capital works. Leasing fees of 10% to 15% of gross rent for new leases and 50% of that rate for renewals are outsourced to third party agents (no fees to the Manager), although the Manager may provide leasing services in limited circumstances.

Alpine notes that establishment costs have not yet been capped. Due diligence cost caps are set at A$3 million per annum for discretionary expenditure and A$300,000 for non-discretionary expenditure. Property management is outsourced and treated as a property expense.

Alpine highlights that there is no clawback provision and no management fee offset in the draft term sheet. The absence of a clawback reduces the alignment of interests between the Manager and investor, as the Manager has no obligation to return performance fees in the event that subsequent returns do not meet the benchmark. Similarly, the absence of a management fee offset means that other sources of revenue generated by the Manager or its affiliates in connection with the Fund's investments do not reduce the management fee payable by the investor.

Alpine further highlights that the Fund's investment research and data expenses, research-related travel expenses, and marketing expenses are expected to be charged to the Fund. While these items are disclosed in the draft term sheet, investors should monitor the quantum of such expenses when the Fund commences operations.

Corporate Governance

As an unregistered unit trust, the Fund does not have a board of directors. The functional equivalent is the Trustee, which is expected to be an affiliate of Cordova. As a result, there is no possibility of independent oversight equivalent to what is usually accomplished by the Board of Directors of a corporate fund vehicle.

However, Alpine notes that UNITE (REST) retains significant governance rights as the sole investor, including direct veto rights over all proposed investments and the ability to remove the Manager. These governance rights provide a meaningful level of independent oversight for the Fund.

Investment Strategy

The Fund will seek to invest in industrial real estate across Australia, with a primary focus on the Eastern seaboard (Sydney and Melbourne). The strategy encompasses core plus, value-add, and develop-to-core approaches, with majority control of assets (in most cases 100% ownership). The Fund targets annual equity investment of A$150 to A$250 million, with a target portfolio of 20 to 30 properties when fully invested.

The Fund expects to hold assets indefinitely, with REST making the decision to sell or retain individual assets at the Convert-to-Core event. Leverage targets are a loan-to-value ratio of 50% to 55% on the stabilized portfolio and loan-to-cost of up to 65% during development and value-add periods.

Investment criteria include: 100% industrial (including specialty sub-sectors); 100% Australia (primarily Eastern seaboard); maximum 25% exposure outside Sydney and Melbourne; capital commitment of A$15 to A$150 million per asset; maximum 10% leasehold (subject to a minimum 99-year lease term); and maximum 25% in any single asset.

Chapter Summary

YELLOW

The Fund had not been legally formed at the time of this review, with the trust deed and IMA not yet prepared, the auditor not formally appointed, and banking arrangements not confirmed. In addition, the draft term sheet does not include a clawback provision or management fee offset, and affiliate services are charged through to the Fund via the property operating servicing fee. The use of sub-trusts adds structural complexity. These observations collectively drive a Yellow rating for *Fund Structure, Terms & Investor Alignment*. Nonetheless, Alpine notes that UNITE (REST) retains significant governance rights, including direct veto rights over all proposed investments.

ALPINE

Chapter 5

Service Providers, Delegation & Oversight

GREEN

Chapter 5: Service Providers, Delegation & Oversight

Provider Roster

The Fund is expected to be self-administered, with no independent third party administrator appointed. Alpine notes that the absence of an independent administrator eliminates a key external check on the Manager's operations, including independent oversight of NAV calculation, cash reconciliation, and investor reporting. However, Alpine considers that this risk is partially mitigated by the engagement of Guardian Trust Limited ("Guardian") as Custodian, which provides independent custody over the Fund's assets and controls all asset transfers.

Guardian Trust Limited has been engaged to provide custodial services to the Fund. Guardian will hold title to all assets and control all asset transfers. Alpine confirmed Guardian's expected engagement via email on February 15, 2024.

Sterling Realty Services ("Sterling") has been engaged as property manager and uses the MRI accounting system with a general ledger to maintain the books and records at the property level. Sterling's asset management team meets with property and facility managers on a monthly basis.

The Fund's auditor is expected to be Thornton Blackwell LLP ("Thornton Blackwell"). As at the time of this review, Thornton Blackwell had not been formally engaged and an engagement letter had not been signed. Alpine notes that Thornton Blackwell also provides non-audit services to the management company. While dual engagements are not uncommon, Alpine highlights that the provision of non-audit services by the Fund's auditor can create an appearance of conflict of interest.

Alpine reviewed the GS 007 report prepared by Thornton Blackwell on Sterling's IT controls over the MRI accounting system. The report contained a qualified opinion: Sterling's IT controls over the MRI system lacked sufficient detail and evidence. In addition, the report included an emphasis of matter noting that certain control objectives were not triggered during the testing period. Alpine recommends that investors monitor Sterling's IT control environment and request updated GS 007 reports on an annual basis.

Chapter Summary

GREEN

No material issues were identified with respect to the Fund's service provider roster, supporting a Green rating for *Service Providers, Delegation & Oversight*. While the Fund is self-administered, the engagement of Guardian Trust Limited as Custodian provides a meaningful level of independent oversight. Alpine notes the qualified opinion in the GS 007 report on Sterling's IT controls and the fact that the auditor engagement letter had not been signed at the time of this review.

Chapter 6

Investment Operations & Portfolio Controls

GREEN

Chapter 6: Investment Operations & Portfolio Controls

Portfolio Management Systems

Alpine notes that Cordova uses Microsoft Excel ("Excel") to track the deal pipeline. While Alpine would generally prefer to see the firm implementing a more robust, third party deal management system, Alpine notes that the Manager's investment process is subject to direct oversight from REST, which provides an additional layer of control.

Sterling Realty Services ("Sterling") maintains the Fund's accounting books and records at the property level using the MRI accounting system with a general ledger. All reconciliation is performed internally by the Manager.

Investment Decision Process

Investment decisions are made by the Investment Committee ("IC"), which is comprised of David Karras (Executive Director), Marcus Flynn (Executive Director), and James Maguire (Executive Director, Finance & Operations / CCO). The Manager represented that investment approval requires a unanimous vote of the IC.

In addition, UNITE (REST) retains direct involvement in the investment process. For proposed investments with equity of A$50 million or less, the Manager submits an Initial Investment Memorandum ("IIM") and REST has five business days to confirm or exercise its veto right. For investments above A$50 million, a Preliminary Investment Memorandum ("PIM") is submitted and REST has eight business days to approve or veto. Following the completion of full due diligence, a Final Investment Memorandum ("FIM") is submitted and REST has five business days to confirm. Alpine considers REST's direct veto rights over all proposed investments to be a meaningful governance control.

Investment Allocation

The Manager has a written investment allocation policy, dated August 2023, which was provided to Alpine for review. The policy provides priority to CREP 4 for industrial value-add opportunities. The Manager confirmed that it does not expect new mandates to overlap with the Fund's investment activities.

The allocation committee is comprised of the three Executive Directors and four business unit heads. Alpine considers this to be an appropriately constituted committee for managing allocation decisions.

Cash Tracking & Accounting

Internally, the Manager represented that it performs monthly cash reconciliations and monitors cash on a daily basis. Sterling maintains the property-level books and records on the MRI accounting system, and the Manager has view-only access to the bank accounts.

Cash Controls

The Fund is expected to maintain two bank accounts per property: a trust account and a rental income account, controlled by Sterling (the property manager). Cordova has view-only access to the bank accounts.

Wire instructions require dual signature from two Executive Directors before submission to the Custodian. Guardian (the Custodian) controls all asset transfers and is expected to verify wire instructions independently. A verification callback procedure is in place for third party wires above a materiality threshold. However, Alpine highlights that new payment instructions are not subject to verification callback. Alpine considers this a deficiency and would recommend that the Manager extend the verification callback procedure to all new payment instructions.

Account opening requires two authorized signatories.

The Manager represented that non-investment expenses are occasionally paid by the management company and reimbursed on a quarterly basis.

Debt is expected at the Fund or property level, with floating rate facilities being typical (fixed rate also possible). Debt covenants are monitored quarterly by the deal team.

Chapter Summary

GREEN

Overall, the Fund's cash and portfolio controls benefit from the custodial arrangement with Guardian, which holds title to all assets and controls all asset transfers. Dual signature from two Executive Directors is required for wire instructions, and REST retains direct veto rights over all proposed investments. These controls support a Green rating for *Investment Operations & Portfolio Controls*. Nonetheless, Alpine notes that new payment instructions are not subject to verification callback, that the Manager uses Excel to track the deal pipeline, and that the Fund is self-administered with all reconciliation performed internally.

ALPINE

Chapter 7

Valuation, Asset Existence & Investor Reporting

GREEN

Chapter 7: Valuation, Asset Existence & Investor Reporting

Valuation Controls

Alpine's starting point for a discussion of the Fund's pricing procedures is to recognize that, as a fund-of-one mandate with a single institutional investor, the risk of deliberate mispricing to disadvantage investors is significantly lower than in a commingled vehicle. The performance fee is calculated only at the Deemed Realisation Event (between the fifth and seventh anniversaries), which further reduces the incentive for the Manager to manipulate intra-period pricing.

From a pricing perspective, the portfolio introduces high valuation risk and is expected to be comprised of solely Level 3 assets (100%).

External valuation agents are appointed for every property from a panel of major international and domestic firms. Agents are subject to mandatory rotation, with a maximum engagement of three consecutive years per asset. Alpine considers this rotation policy to be in line with best practice.

Under the REST mandate, independent valuations are required upon acquisition; at least annually prior to June 30 for development assets; and quarterly after stabilization (one long-form and three short-form valuations per annum). Ground-up developments are independently valued within three months of completion. Where the Manager's quarterly review of carrying value indicates a difference of greater than 5% from the most recent independent valuation, an interim independent valuation is triggered.

The Manager reviews carrying value on a quarterly basis. External valuation agent prices are used in the quarterly NAV calculation, subject to back office review. The Fund's auditor is expected to review all external valuation reports on an annual basis.

Alpine notes that the Manager has not established a formal valuation committee. While the robustness of the external valuation framework partially mitigates this deficiency, Alpine recommends that the Manager establish a formal valuation committee to provide structured governance over the valuation process, document committee deliberations, and formalize the escalation and challenge procedures. Investors are encouraged to monitor developments in this area.

Asset Existence & Verification

The Fund's assets are expected to be evidenced by property title documents held by Guardian Trust Limited (the Custodian). Guardian holds title to all assets and controls all asset transfers, providing a robust segregation of duties over asset custody. Any attempt to create a fictitious asset would require collusion among multiple parties, including the Custodian, the Manager, external valuation agents, and legal counsel.

Investor Reporting

The Fund is self-administered and the Manager issues the quarterly NAV. An estimated NAV is provided to REST 10 business days prior to quarter-end. The final NAV is issued within 45 days of quarter-end and within 90 days of year-end. The Fund's first financial year is expected to end on June 30, 2024.

Financial statements will be prepared under Australian International Financial Reporting Standards. Alpine notes that it prefers financial statements prepared under International Financial Reporting Standards ("IFRS") or U.S. Generally Accepted Accounting Principles ("U.S. GAAP"), and considers Australian IFRS to be broadly equivalent.

The Manager distributes audited financials directly to REST. Given the self-administered nature of the Fund, there is no independent administrator to receive and review the audited accounts.

Chapter Summary

GREEN

Internal controls over the pricing environment appear robust: the Manager has implemented a comprehensive external valuation framework with mandatory agent rotation, quarterly independent valuations, and an acquisition-triggered valuation requirement. The Custodian holds title to all assets and the auditor is expected to review all external valuation reports annually. The combination of these factors supports a Green rating for *Valuation, Asset Existence & Investor Reporting*. Nonetheless, Alpine recommends that the Manager establish a formal valuation committee to provide structured governance over the valuation process.

ALPINE

Chapter 8

Manager Transparency & LP Communications

GREEN

Chapter 8: Manager Transparency & LP Communications

Diligence Process Cooperation

The Manager was responsive and forthcoming throughout the due diligence process, providing requested documents promptly and making staff available for follow-up questions. There were no instances of evasion, delayed responses, or attempts to restrict the scope of Alpine's review.

Disclosure Quality

The Manager proactively disclosed the Ferraro Holdings seed investor arrangement, the pending litigation matter, the resolved ATO dispute, the family relationships within the firm, and the cybersecurity deficiencies. This level of candor is constructive and indicates a willingness to address operational gaps transparently.

Limitations

Alpine notes that the IT policy and draft cybersecurity policy were not provided to Alpine at the date of report issuance. This is noted as a limitation in the review process. In addition, the Manager did not disclose the quantum of insider capital, which Alpine considers a limitation in assessing the alignment of interests between management and external investors.

Chapter Summary

GREEN

No issues were noted with respect to transparency during the due diligence process, supporting a Green rating for *Manager Transparency & LP Communications*. The Manager was cooperative and forthcoming, and proactively disclosed key governance and operational matters. Alpine notes that the IT policy and draft cybersecurity policy were not provided at the date of report issuance.

Reference Data

1. Manager, Ownership & Governance

Field	Value
Manager name	Cordova Property Partners Pty Limited
Date of commencement of operations	2010
Manager legal structure	Proprietary Limited Company (Australian)
Manager is publicly traded	No
Primary location	Sydney, Australia
Secondary location (planned)	Melbourne, Australia
ASIC registration	August 15, 2010

Principals

David Karras, Executive Director (Co-Founder)

Source: Firm Materials | As of 2023-09-30

David Karras is a co-founder of Cordova Property Partners and serves as Executive Director. David holds an 18.5% ownership stake in the firm and is a member of the Investment Committee.

Marcus Flynn, Executive Director (Co-Founder)

Source: Firm Materials | As of 2023-09-30

Marcus Flynn is a co-founder of Cordova Property Partners and serves as Executive Director. Marcus holds an 18.5% ownership stake in the firm and is a member of the Investment Committee.

James Maguire, Executive Director, Finance & Operations / CCO (Co-Founder)

Source: Firm Materials | As of 2023-09-30

James Maguire is a co-founder of Cordova Property Partners and serves as Executive Director, Finance & Operations. James also serves as the firm's Chief Compliance Officer. James holds an 18.5% ownership stake in the firm and is a member of the Investment Committee.

Simon Elliot, Former Executive Director (Co-Founder, Retired 2022)

Source: Firm Materials | As of 2023-09-30

Simon Elliot is a co-founder of Cordova Property Partners who announced his retirement in 2022. Simon retains a 4.5% ownership stake and continues in a strategic advisory role.

Assets Under Management

Field	Value
AUM report date	September 30, 2023
Total AUM (NAV excluding uncommitted capital)	A$4.25 billion
Manager offers regulated product structures	No
Manager runs separately managed accounts ("SMA")	Yes
Manager runs fund-of-one mandates	Yes

Ownership & Insider Investment

Field	Value
Internal investors	David Karras [18.5%], Marcus Flynn [18.5%], James Maguire [18.5%], Simon Elliot [4.5%]
External investors	Ferraro Holdings Pty Ltd (Robert & Paul Ferraro) [40.0%]
Seed investor relationship	Ferraro Holdings (CREP 1: A$25M; CREP 2: A$26.2M)
Insider investment	Not disclosed (limitation noted)
Insider capital contribution mechanism	100% cash
Insider capital represents significant portion of liquid net worth	Yes (per Manager representation)

Human Resources

Field	Value
Total headcount	39
HR consultant	On retainer
Marketing consultant	Ad hoc
Part-time staff	Yes (3-4 days per week)
Background check provider	VerifyPlus (references, education, criminal)
Credit checks	Key individuals and finance staff

Field	Value
Subsequent checks after hire	No
Employees related within firm	Yes (Thomas Flynn, son of Marcus Flynn ED; Nick Ferraro, son of Robert Ferraro non-exec)
STI	40-80% of base salary, 100% cash
LTI (Leadership Group)	20-30% of relevant performance fees, deferred 3 years

Key Personnel

Name	Title	Notes
David Karras	Executive Director	Co-founder, 18.5% ownership, IC member
Marcus Flynn	Executive Director	Co-founder, 18.5% ownership, IC member
James Maguire	Executive Director, Finance & Operations / CCO	Co-founder, 18.5% ownership, IC member
Simon Elliot	Former Executive Director	Co-founder, 4.5% ownership, retired 2022, strategic role
Andrew Chen	Director, Capital Transactions	
Rachel Bennett	Director, Asset Management	
Luke Spencer	Director, Development	
Olivia Park	Financial Controller	
Maya Pham	Director, Melbourne Real Estate	Based in Melbourne since July 2022
Thomas Flynn	Assistant Development Manager	Son of Marcus Flynn (ED)
Nick Ferraro	Development Manager	Son of Robert Ferraro (non-exec board member)

Departures (Past Two Years)

Name	Title	Reason
Lucas Mitchell	Senior Investment Manager	Relocated
Chris Sullivan	Development Manager	Relocated

Name	Title	Reason
Patricia Lowe	Finance Manager	Other career
Ben Torres	Capital Transaction Manager	Other career
Simon Elliot	Executive Director (Co-Founder)	Retirement (announced 2022)

2. Legal, Regulatory & Compliance

Regulatory Oversight

Field	Value
Australian Securities and Investments Commission (ASIC)	Registered since August 15, 2010
ASIC inspection history	Never inspected
Regulatory sanctions (past ten years)	No

Compliance Infrastructure and Policies

Field	Value
Compliance officer	James Maguire (Executive Director, Finance & Operations / CCO)
Dedicated CCO	No
Compliance consultant	Not appointed
Manager has a compliance manual	Received
Staff attestation to compliance manual	No
Annual recertification	No
Personal trading policy	No monitoring; no pre-clearance; no minimum holding period
Brokerage statements received by compliance	No
Restricted list maintained	No
External directorships	Yes (certain principals)

Claims, Actions, and Conflicts

Field	Value
Manager / affiliate / employee subject of litigation	Yes (pending; managed by external counsel)
ATO dispute	Resolved (no adverse finding)

3. Technology, Cybersecurity & Business Resilience

Information Technology

Field	Value
Technology consultant	Luminar IT Solutions Pty Limited

Cybersecurity Controls

Field	Value
Manager has a cybersecurity policy	No (drafting expected by end Q1 2024)
Formal incident response plan	No
Annual cybersecurity training	No
Endpoint data loss prevention	No
Multi-factor authentication	No

Disaster Recovery / Business Interruption

Field	Value
Manager has a business continuity plan	Received
BCP testing (annual)	Yes

4. Fund Structure, Terms & Investor Alignment

Corporate Structure

Field	Value
Domicile	Australia
Expected legal structure	Unregistered Unit Trust
Date of incorporation	Not yet legally formed (expected close March 2024)
Date of commencement of operations	Not commenced (Pre-Launch)
Asset Class	Real Estate — Industrial
Investor	UNITE (United Employees Superannuation Pty Ltd / REST)
Fund type	Fund-of-one mandate
Sub-trusts	Expected
Board at Fund level	No

Terms

Field	Value
Units denominated in	AUD
Expected commitment	A$500 million (UNITE)
Expected close	March 2024
Term sheet	Draft (not finalized)
IMA	Not yet prepared
Manager removal for cause	Yes
Manager removal without cause	After 5th anniversary (6 months notice + outstanding fees + performance fee)
Convert-to-Core option	REST may elect at Deemed Realisation Event (5th-7th anniversary)
Convert-to-Core terms	30 bps on NAV property operating servicing fee; no ongoing management or performance fee
Clawback	No
Management fee offset	No

Fee Structure

Field	Value
Management fee	0.25% per annum on allocated capital
Property operating servicing fee	0.60% per annum on allocated capital (covers affiliate services)
Performance fee	15% above 9.5% per annum benchmark return
Performance fee calculation	At Deemed Realisation Event (5th-7th anniversary)
Development management fee (ground-up)	3% of total project costs
Development management fee (refurbishing / repositioning)	5% of total project costs
Leasing fee (new leases)	10-15% of gross rent (outsourced to third party agents)
Leasing fee (renewals)	50% of new lease rate
Establishment costs cap	Not yet determined
Due diligence cost cap (discretionary)	A$3 million per annum
Due diligence cost cap (non-discretionary)	A$300,000 per annum

Investment Strategy

Field	Value
Strategy	Real Estate — Industrial
Sub Strategy	Core plus / Value-add / Develop-to-core
Regional Focus	Australia (Eastern seaboard — Sydney, Melbourne)
Ownership	Majority control (most cases 100%)
Target equity per year	A$150-250 million
Target portfolio size	20-30 properties
Hold period	Indefinite (REST decides at Convert-to-Core)
LTV (stabilized portfolio)	50-55%
LTC (development / value-add)	Up to 65%

Field	Value
Max allocation outside Sydney / Melbourne	25%
Capital commitment per asset	A$15-150 million
Max leasehold exposure	10% (min 99-year lease)
Max single asset exposure	25%
Sector concentration	100% industrial (including specialty sub-sectors)
Geographic concentration	100% Australia (primarily Eastern seaboard)

5. Service Providers, Delegation & Oversight

Administrator

Field	Value
Administrator	None (self-administered)

Custodian

Field	Value
Custodian	Guardian Trust Limited
Custodian role	Holds title to all assets; controls all asset transfers

Auditor

Field	Value
Auditor	Thornton Blackwell LLP (expected; engagement letter not yet signed)
Non-audit services to management company	Yes
GS 007 report	Qualified opinion — Sterling's IT controls over MRI lacked sufficient detail/evidence; emphasis of matter: certain control objectives not triggered during testing period
Accounting standard	Australian International Financial Reporting Standards

Property Manager

Field	Value
Property manager	Sterling Realty Services
Accounting system	MRI (with general ledger)

Other Providers

Field	Value
IT consultant	Luminar IT Solutions Pty Limited
Expected banking	Major Australian financial institution (not confirmed)

6. Investment Operations & Portfolio Controls

Portfolio Management

Field	Value
Deal management system	Excel
Accounting system (property level)	MRI (maintained by Sterling)
Internal accounting records	Monthly reconciliation; daily cash monitoring

Investment Process

Field	Value
Investment Committee	David Karras, Marcus Flynn, James Maguire (unanimous vote)
Allocation policy	Written (dated August 2023)
Allocation committee	3 Executive Directors + 4 business unit heads
CREP 4 priority	Industrial value-add
REST approval (equity ≤ A$50M)	IIM — 5 business days to confirm/veto
REST approval (equity > A$50M)	PIM — 8 business days to approve/veto
REST approval (post full DD)	FIM — 5 business days to confirm

Cash & Accounting

Field	Value
Bank accounts per property	2 (trust + rental income), controlled by Sterling
Cordova access to bank accounts	View-only
Internal cash reconciliation	Monthly (daily monitoring in practice)

Asset Transfers

Field	Value
Custodian controls all transfers	Yes (Guardian)
Wire authorization	Dual signature from 2 Executive Directors

Field	Value
Verification callback	Yes (third party wires above materiality threshold)
New payment instructions subject to callback	No (flag)
Account opening	2 authorized signatories required
Non-investment expense payments	Occasionally paid by management company; reimbursed quarterly

Debt

Field	Value
Debt expected	At Fund or property level
Typical rate structure	Floating (fixed possible)
Covenant monitoring	Quarterly (deal team)

7. Valuation, Asset Existence & Investor Reporting

Valuation Controls

Field	Value
External valuation agents	Yes (for every property; panel of major international and domestic firms)
Agent rotation	Max 3 consecutive years per asset
Independent valuation upon acquisition	Yes
Quarterly independent valuation (stabilized)	Yes (1 long-form + 3 short-form)
Annual independent valuation (development)	At least annually prior to June 30
Ground-up development valuation	Within 3 months of completion
Interim independent valuation trigger	>5% difference from most recent independent valuation
Valuation committee	No (Alpine recommends forming one)
Auditor reviews all external valuation reports	Yes (annually)
Level 3 assets	100%

Investor Reporting

Field	Value
NAV issuance	Manager (self-administered)
Estimated NAV	10 business days prior to quarter-end (for REST)
Final NAV — quarterly	Within 45 days of quarter-end
Final NAV — annual	Within 90 days of year-end
First financial year end	June 30, 2024
Accounting standard	Australian International Financial Reporting Standards
Distribution of audited financials	Manager distributes directly to REST

8. Manager Transparency & LP Communications

Field	Value
Manager cooperation during diligence	Full cooperation
Document provision	Prompt, no delays
Staff availability for follow-up	Yes
Evasion or scope restriction	None
Proactive disclosure	Yes (Ferraro arrangement; litigation; ATO dispute; family relationships; cybersecurity deficiencies)
Limitations noted	IT policy and draft cybersecurity policy not provided at date of report issuance; insider capital not disclosed
