Overview

Manager Overview

Granite Credit Advisors (Luxembourg), LLC (the "Manager") reported assets under management of \$9.65 billion (including \$3.06 billion of uncalled capital) as at June 30, 2025. Founded in 2002, the firm operates private equity and direct lending strategies from offices in West Palm Beach (FL), Chicago (IL), and New York (NY) with 116 employees.

Fund Overview

Granite Credit Partners VII (Luxembourg) Feeder SCSp SICAV-RAIF (the "Fund") was formed in Luxembourg on September 5, 2025 and commenced operations on December 13, 2025. The Fund is a feeder into a Luxembourg Master Fund pursuing senior secured direct lending to middle-market U.S. and Canadian companies. Target raise: \$2.5 billion; \$435 million committed as at Q4 2025.

Controls Overview

Continental Bank Global Fund Services (Luxembourg) S.a r.l. ("Continental Bank") serves as administrator and depositary. Crestline Fund Administration ("Crestline") is the loan administrator. Auditor: Whitfield Young LLP. Prescott Valuation Group ("Prescott") provides semi-annual independent portfolio pricing. Harborview Management Company (Lux) S.A. serves as AIFM under AIFMD.

Strengths

- Established institutional platform with over two decades of middle-market investment history, a deep team of 116 professionals, and a diversified product line across private equity, direct lending, and structured credit.
- Prescott Valuation Group appointed as independent external valuation agent performing semi-annual full portfolio pricing, providing strong segregation of duties in the valuation process.
- Comprehensive cybersecurity framework aligned to NIST, including annual penetration testing, data loss prevention, multi-factor authentication, and a formal Written Information Security Program.
- Registered Investment Adviser subject to SEC regulatory oversight, with completed examinations and remediated findings demonstrating a responsive compliance posture.

Risks

- Segregation of duties concern: Chief Financial Officer / Chief Compliance Officer serves on the Investment Committee and participates in carried interest, creating overlapping conflicts.
- Expert network controls are insufficient: no pre-clearance, no blackout period, and consultations are not documented; compliance reviews are conducted only retroactively.
- Administrator provides limited operational oversight: Continental Bank does not control banking accounts, is not involved in treasury operations, and is excluded from wire transfer verification.
- System expenses, research travel, and broken deal costs are charged to the Fund, which Alpine views as management company overhead that should not be passed through to investors.

Assessment

OVERALL RATING: GREEN

Granite Credit Advisors (Luxembourg), LLC ("the Manager"), the Luxembourg affiliate of Granite Capital Advisors, LLC (d/b/a Granite Credit Partners "GCP"), wholly owned by Granite Group Holdings LP ("Granite Partners" or "Granite"), serves as Manager. The firm was founded in 2002 by Jonathan Hargrove (CEO / Managing Partner) as a private equity platform focused on middle-market transactions. A dedicated direct lending strategy was launched in 2008, and the credit platform was rebranded as GCP in 2019. The Manager reported AUM of \$9.65 billion (including \$3.06 billion of uncalled capital commitments) as at June 30, 2025 and maintains offices in West Palm Beach (FL), Chicago (IL), and New York (NY), with a total headcount of 116.

Granite Credit Partners VII (Luxembourg) Feeder SCSp SICAV-RAIF (the "Fund") was formed in Luxembourg on September 5, 2025 and commenced operations on December 13, 2025. The Fund operates as a feeder vehicle investing through a Luxembourg Intermediate Fund into a Luxembourg Master Fund, which invests side-by-side with the corresponding U.S. Fund. The Fund pursues a senior secured direct lending strategy targeting middle-market companies in the United States and Canada with EBITDA of \$10 million to \$50 million, across healthcare, financial services, business and technology services, industrials, and consumer/retail sectors. Investments are structured as senior secured credit facilities comprising term loans, revolving lines, and delayed draw term loans, with selective use of warrants and minority equity co-investments. The Fund expects to hold 60 to 80 investments over its investment period. As at Q4 2025, the Fund had raised \$435 million in commitments against a target of \$2.5 billion.

Continental Bank Global Fund Services (Luxembourg) S.a r.l. ("Continental Bank", the "Administrator") has been engaged to provide both administration and depositary services to the Fund. Crestline Fund Administration ("Crestline") serves as dedicated loan administrator with eight staff assigned to GCP. Prescott Valuation Group ("Prescott") has been appointed as external valuation agent, performing semi-annual full portfolio pricing. Overall, Continental Bank's operational oversight is relatively limited: the Administrator does not control banking accounts for investor capital activity, is not involved in treasury operations, and is excluded from the wire transfer verification process.

As Alpine's primary due diligence observation, Alpine highlights the dual role of Marco Delgado (CFO / CCO), who serves as both the firm's Chief Financial Officer and Chief Compliance Officer, sits on the Investment Committee, and participates in carried interest. This arrangement creates multiple layers of conflict: the individual responsible for compliance oversight has a financial interest in the investment decisions he is tasked with overseeing, and the segregation between investment and compliance functions is compromised. The Manager has represented that it plans to hire a dedicated CCO within 12 months. David Steinberg (Deputy CCO / General Counsel) provides supporting compliance coverage. Alpine would strongly recommend that investors require a committed timeline for the hiring of a dedicated CCO and the removal of compliance personnel from the Investment Committee.

Separately, Alpine highlights material weaknesses in the Manager's expert network controls. The firm utilizes two expert network providers, InsightBridge and Alderson Research, conducting approximately two to six calls per month. While the firm maintains formal contracts with both providers and has an insider trading policy that covers expert network usage, Alpine notes that expert network consultations are not subject to pre-clearance by compliance, there is no blackout period for consultations with former public company executives, and consultations are not documented. Compliance reviews are conducted only retroactively, with approximately 25% of calls chaperoned. Alpine considers these controls to be insufficient given the nature of the information exchanged and

would recommend that the Manager implement pre-clearance, mandatory documentation, and a blackout period for all expert network consultations.

With respect to cash controls, Alpine notes that the Manager maintains a dual-signature policy for wire transfers. However, the Administrator is excluded from the wire transfer process: Continental Bank does not control banking accounts and is not involved in treasury operations. Furthermore, transfers above threshold are not subject to a verification callback. Alpine would prefer to see the Administrator incorporated into the wire transfer process and for all above-threshold transfers to be subject to independent callback verification.

Alpine notes that the Administrator accepts pricing from the Manager without conducting independent verification procedures. While Prescott has been appointed as external valuation agent and performs semi-annual full portfolio pricing, Alpine highlights that Prescott's reports are not updated at each NAV date and are sent to the Manager rather than directly to the Administrator. Alpine would prefer that Prescott provide its reports directly to Continental Bank to ensure a superior segregation of duties in the valuation process. In addition, Alpine notes that the valuation committee is not comprised of a majority of non-investment professionals; Alpine would prefer to see the committee reconstituted to remove any appearance of conflicts of interest.

With respect to expenses, Alpine notes that system expenses, research and due diligence travel, and broken deal costs are charged to the Fund. Alpine disagrees with the characterization of system expenses as a fund-level cost, viewing such expenditures as management company overhead. Investors should monitor the level of operating expenses charged through the Fund. As a proxy, the audited financial statements for the prior vintage (GCP VI Luxembourg Feeder for the fiscal year ended December 31, 2025) indicate professional and administration fees of \$745,739.

Alpine further highlights the complex multi-entity fund structure spanning Luxembourg, Delaware, Irish, and Cayman jurisdictions. While this is a common feature of institutional private credit platforms seeking to accommodate a diverse investor base, the structure unavoidably increases the degree of accounting and operational complexity. In addition, the Manager utilizes multiple administrators across its product line and the Fund's auditor also provides audit and non-audit services to the management company. While Alpine has no immediate concerns, these arrangements warrant monitoring.

With respect to ownership, Jonathan Hargrove holds more than 50% of the equity of Granite Partners, with the remaining equity held by 12 additional Partners (13 total owning 80%). A 20% minority interest is held by Allied Asset Holdings, Inc. (NYSE: ALH), a publicly traded multi-boutique asset management platform, which acquired its stake in early 2022. ALH operates autonomously and has no day-to-day involvement in Granite's operations. Specific ownership percentages among the Partners were not disclosed. Alpine notes that Jonathan has a 10-year employment agreement entered into as part of the ALH transaction and periodically sells interests to senior professionals to broaden the ownership base.

The Manager represented that insider investment as at June 30, 2025 was \$588.8 million, equivalent to 6.2% of total commitments across active funds, all of which was funded in cash. Alpine views the 100% cash funding of insider commitments as a positive indicator of alignment. However, the Manager represented that insider commitments do not represent a significant portion of the liquid net worth of key professionals. Insider capital allocates pari passu to external investors, except for the absence of fees.

Overall, the Manager maintains a well-resourced institutional platform with a deep team, established track record, and a reasonably mature operational infrastructure. The appointment of Prescott as external valuation agent, the comprehensive cybersecurity framework, and the breadth of the service provider roster are constructive. However, the dual role of the CFO/CCO on the Investment Committee, the weaknesses in expert network controls, and the limited operational oversight provided by the Administrator represent areas for improvement. Given that these

observations do not rise to the level of material operational risk, Alpine has provided a Green overall assessment. Investors should monitor the Manager's progress on hiring a dedicated CCO and enhancing expert network controls.

CONFIDENTIAL

Scope & Verification

Scope of Review

Alpine's review included conference calls with Continental Bank Global Fund Services (the Fund's Administrator and Depositary) and Crestline Fund Administration (loan administrator), a review of the Fund's offering documents including the Limited Partnership Agreement and Private Placement Memorandum, the Manager's compliance manual and valuation policy, Written Information Security Program, GCP VI Luxembourg Feeder audited financial statements, Form ADV, and independent checks against public registers and regulatory databases.

ALPINE

Chapter 1

Manager, Ownership & Governance

GREEN

Chapter 1: Manager, Ownership & Governance

Management Company and Affiliates

Granite Credit Advisors (Luxembourg), LLC ("the Manager") is the Luxembourg affiliate of Granite Capital Advisors, LLC (d/b/a Granite Credit Partners "GCP"), which is wholly owned by Granite Group Holdings LP ("Granite Partners" or "Granite"). The firm was founded in 2002 by Jonathan Hargrove (CEO / Managing Partner) as a private equity platform focused on middle-market transactions. A dedicated direct lending strategy was launched in 2008, and the credit platform was rebranded as Granite Credit Partners in 2019. The Manager maintains its headquarters in West Palm Beach (FL), with additional offices in Chicago (IL) and New York (NY).

Assets under Management

The Manager reported assets under management ("AUM") of \$9.65 billion (including \$3.06 billion of uncalled capital commitments) as at June 30, 2025. Alpine defines AUM as net asset value ("NAV") excluding uncommitted capital. Per Alpine's regulatory AUM analysis, regulatory AUM ("RAUM") reported to the United States Securities and Exchange Commission ("SEC") was \$4.34 billion as at December 31, 2024. Alpine notes that RAUM reported to the SEC must follow certain calculation methodologies (e.g. using gross assets). As such, RAUM will generally differ from industry standard AUM reporting due to these reporting variations.

The Manager operates across three principal product lines: private equity (Granite Investment Partners "GIP"), direct lending (GCP), and structured credit (Granite Special Opportunities Fund "GSO"). The private equity platform has raised six vintages with AUM of \$1.32 billion and total commitments of \$2.74 billion; the most recent vintage, GIP VI, closed on February 29, 2026 at \$99 million. The direct lending platform has raised seven vintages; GCP VI closed in Q3 2025, having raised \$1.9 billion, while GCP III was liquidated in December 2025. GSO has AUM of \$127.8 million as at June 30, 2025, with a second vintage planned targeting \$400 million by end of 2026. The Manager also operates six separately managed account and fund-of-one mandates totaling \$1.02 billion in AUM, with a minimum mandate size of \$250 million. Alpine notes that the SMA mandates utilize different service providers from the commingled products.

Insider Investment

The Manager represented that insider investment as at June 30, 2025 was \$588.8 million, equivalent to 6.2% of total commitments across active funds. Alpine notes that 100% of insider commitments are funded in cash, which Alpine views as a positive indicator of alignment, as it eliminates the dilutive effect of fee waiver or cashless contribution mechanisms. However, the Manager represented that insider commitments do not represent a significant portion of the liquid net worth of key professionals. Investors should monitor the degree to which insiders choose to retain personal capital within the firm's products.

Alpine understands that insider capital allocates pari passu to external investors, except for the absence of fees. The Manager also maintains GRGH Investors LLC, an employee co-investment vehicle on the private equity side that permits employees below the Vice President level to invest up to \$30,000 per investment on a pari passu basis. Alpine notes that there is no equivalent co-investment vehicle for the credit products. Compliance has oversight over the co-investment process, and cherry-picking is not permitted.

Ownership & Succession

Jonathan Hargrove (CEO / Managing Partner) holds more than 50% of the equity of Granite Partners, with the remaining equity held by 12 additional Partners (13 total Partners owning 80%). A 20% minority interest is held by Allied Asset Holdings, Inc. (NYSE: ALH), a publicly traded multi-boutique asset management platform, which acquired its stake in early 2022. All proceeds from the ALH transaction were invested in Granite funds, and ALH's ownership is subject to pro rata dilution. ALH operates autonomously and has no day-to-day involvement in Granite's operations. There are no buyback or sunset provisions relating to the ALH stake.

Specific ownership percentages among the Partners were not disclosed, which Alpine considers a limitation. Jonathan has a 10-year employment agreement entered into as part of the ALH transaction, and periodically sells interests to senior professionals to broaden the ownership base.

Alpine notes that the Manager has not established a formal succession plan. Given the concentration of equity and control in Jonathan Hargrove, the firm could usefully consider developing a formal succession plan to provide investors with comfort regarding business continuity.

Human Resources

As at June 30, 2025, the Manager had a total headcount of 116 across its West Palm Beach, Chicago, and New York offices. The team includes an Operating Advisory Group ("OAG") led by Alex Park (Managing Director) with 10 dedicated staff who provide consulting services to Granite and its portfolio companies exclusively. The Manager also retains 15 or more Executive Partners, external professionals who assist with deal origination and serve on portfolio company boards.

With respect to notable departures, the firm noted the departure of Tyler Reed (former Partner) in 2025, who left to pursue another opportunity. The Manager confirmed that the departure was amicable with no ensuing litigation.

Conversely, the firm has made several notable hires in recent years: Nathan Walsh (Managing Director, March 2023), James Hartley (Managing Director, May 2023), Richard Kaplan (Partner, January 2025), Benjamin Cole (Managing Director / Head of Capital Markets, April 2025), and Ryan Torres (Vice President, IT, June 2025).

The Manager utilizes TriNet as its Professional Employer Organization ("PEO") for co-employment services. Background checks on all new hires are conducted by ClearView Screening. Staff are compensated with a base salary and discretionary bonus, with certain senior professionals awarded carried interest in the underlying funds.

Sarah Kwon serves as the Manager's Chief Financial Officer ("CFO") and is supported by the back office team. Marco Delgado (CFO / CCO) has overall responsibility for finance and compliance functions.

Chapter Summary

GREEN

Overall, no material diligence issues were identified at the management company level, which supports a Green rating for *Manager, Ownership & Governance*. The Manager maintains a well-resourced institutional platform with a deep team, established track record, and diversified product line. Nonetheless, Alpine highlights the concentration of equity and control in Jonathan Hargrove, the absence of a formal succession plan, and the non-disclosure of specific ownership percentages among the Partners. The 20% minority interest held by Allied Asset Holdings, Inc. (NYSE: ALH) warrants ongoing monitoring.

ALPINE

Chapter 2

Legal, Regulatory & Compliance

YELLOW

Chapter 2: Legal, Regulatory & Compliance

Regulatory Oversight

The Manager has been a registered investment adviser with the SEC since March 28, 2014. Harborview Management Company (Lux) S.A. ("Harborview") serves as the Fund's AIFM under AIFMD and is authorized by the Commission de Surveillance du Secteur Financier ("CSSF").

The Manager was subject to its most recent SEC examination beginning June 1, 2023, which was completed in February 2024. The examination resulted in one finding: a failure to disclose the Operating Advisory Group ("OAG") arrangement in investor materials, specifically that the OAG President held a call right on parent company shares for \$100. The Manager remediated the finding through supplemental Form ADV disclosures and financial statement disclosures. Alpine was permitted to review the relevant correspondence. A prior examination in 2016 resulted in three findings related to valuation policy disclosures and the annual compliance review; all were remediated.

Compliance Infrastructure and Policies

Alpine highlights that the Manager does not have a dedicated Chief Compliance Officer ("CCO"). Marco Delgado serves as both CFO and CCO, sits on the Investment Committee, and participates in carried interest. Alpine considers this arrangement to present material segregation of duties concerns: the individual responsible for compliance oversight has a financial interest in the investment decisions he is tasked with overseeing. The Manager has represented that it plans to hire a dedicated CCO within 12 months. David Steinberg (Deputy CCO / General Counsel) provides supporting compliance coverage. Alpine would strongly recommend that investors require a committed timeline for the hiring of a dedicated CCO and the removal of compliance personnel from the Investment Committee.

The firm engages Pacific Compliance Group ("PCG") as its external compliance consultant. PCG conducts periodic mock audits; the most recent was completed in 2025 with no material findings. In addition, PCG provides annual compliance training to staff below the Managing Director level, while Morrison & Sterling LLP provides training to Managing Directors and above.

The Manager has a written compliance manual, dated September 1, 2025, that was provided to Alpine for review in soft copy. The document appears to be reasonably detailed, covering key compliance policies and procedures.

Personal Trading

The Manager has a written personal trading policy, which is a component of the firm's compliance manual. Employee personal trading is monitored through CompliTrack (MCO). Pre-clearance is required for IPOs and private placements only; other reportable securities are not subject to pre-clearance. Alpine notes that the personal account dealing policy does not include a minimum holding period on transactions. The implementation of a minimum holding period eliminates the appearance of conflicts of interest associated with short-term trading activity. The Manager confirmed that it receives all employee brokerage statements directly from brokers through direct data feeds.

Trade Errors

The Manager has a trade error policy under which losses arising from trade errors may be borne by clients. Alpine disagrees with this approach and would prefer that the Manager absorb all trade error losses, as is the prevailing market practice for institutional managers.

Soft Dollars

The Manager confirmed that it does not engage in soft dollars or commission sharing.

Expert Networks

The Manager utilizes two expert network providers, InsightBridge and Alderson Research, under formal contracts. The firm conducts approximately two to six expert network calls per month. The firm's insider trading policy covers expert network usage, and a compliance script is read before each call. Approximately 25% of calls are chaperoned by compliance.

However, Alpine highlights material weaknesses in the firm's expert network controls. Expert network consultations are not subject to pre-clearance by compliance, there is no blackout period for consultations with former public company executives, and consultations are not documented. Compliance reviews are conducted only retroactively. Alpine considers these controls to be insufficient given the nature of the information exchanged and would recommend that the Manager implement pre-clearance, mandatory documentation, and a blackout period for all expert network consultations.

Anti-Money Laundering / Know Your Customer

The Manager represented that anti-money laundering ("AML") and know-your-customer ("KYC") verifications are conducted by the Administrator for commingled vehicles. Legacy self-administered accounts conduct AML/KYC in-house. Harborview serves as AML Officer for Cayman-domiciled vehicles.

Claims, Actions, and Conflicts

The Manager represented that there has been ordinary course litigation on the private equity side, but no litigation relating to its direct lending products and no material claims. Alpine recommends that investors conduct a periodic background check on the Manager, any relevant affiliates, and senior employees to verify this representation.

The Manager maintains a restricted list containing 69 names as at the date of this review.

The Manager has a combined Directors' and Officers' / Errors and Omissions ("D&O / E&O") insurance policy with total coverage of \$40 million. Alpine understands that the cost of the policy is charged to the management company.

Chapter Summary

YELLOW

While the Manager has established a baseline level of controls over its compliance environment, Alpine highlights material concerns over the dual role of Marco Delgado (CFO / CCO), who sits on the Investment Committee and participates in carried interest. In addition, the Manager's expert network controls are insufficient: consultations are not subject to pre-clearance, there is no blackout period, and calls are not documented. These observations drive a Yellow rating for *Legal, Regulatory & Compliance*.

ALPINE

Chapter 3

Technology, Cybersecurity & Business Resilience

GREEN

Chapter 3: Technology, Cybersecurity & Business Resilience

IT Overview

The Manager employs Ryan Torres (Vice President, IT) as the internal point person for technology operations. External IT support is provided by Vertex IT Solutions. Lakeshore Security provides cybersecurity awareness training, and FireLine Testing conducts annual penetration testing. The firm previously utilized Watchpoint Cybersecurity as its managed cybersecurity provider; this relationship was replaced by Sentinel CyberShield in December 2023.

The Manager completed a cloud migration in June 2025, transitioning from on-premises infrastructure to Microsoft Azure. The firm leverages Microsoft Office 365, OneDrive, and SharePoint for collaboration and document management.

Cybersecurity Controls

The Manager maintains a formal Written Information Security Program ("WISP") aligned to the NIST cybersecurity framework, which was provided to Alpine for review in soft copy. Alpine is pleased to see the Manager following a regimented approach to cybersecurity.

The firm has implemented a comprehensive set of cybersecurity controls, including multi-factor authentication, endpoint data loss prevention, enforced user access controls, and network security measures including firewall, intrusion detection, antivirus, and anti-malware solutions. Annual penetration testing is conducted by FireLine Testing; the most recent test did not result in material findings. Lakeshore Security provides ongoing cybersecurity awareness training, including phishing simulations.

Business Continuity

The Manager has a written business continuity plan ("BCP") which was provided to Alpine for review in soft copy. Alpine notes that the BCP is currently being updated to reflect the firm's June 2025 cloud migration to Azure. The Manager indicated that the updated BCP is expected to be finalized by April 2026. Investors are encouraged to monitor the completion of this update.

The Manager stated that in the event staff are unable to access the firm's premises, employees are equipped with mobile devices and laptops that can be used to remotely access the firm's systems. The cloud-based infrastructure provides inherent redundancy and disaster recovery capabilities.

Chapter Summary

GREEN

The Manager has established a comprehensive cybersecurity framework aligned to the NIST standard, with appropriate technical controls including multi-factor authentication, data loss prevention, annual penetration testing, and formal security awareness training. This supports a Green rating for *Technology, Cybersecurity & Business Resilience*. Alpine notes that the BCP is being updated to reflect the June 2025 cloud migration and expects finalization by April 2026.

ALPINE

Chapter 4

Fund Structure, Terms & Investor Alignment

GREEN

Chapter 4: Fund Structure, Terms & Investor Alignment

Legal Structure

Granite Credit Partners VII (Luxembourg) Feeder SCSp SICAV-RAIF (the "Fund") was formed in Luxembourg on September 5, 2025 and commenced operations on December 13, 2025. The Fund is structured as a Luxembourg special limited partnership (SCSp) registered as a Reserved Alternative Investment Fund (RAIF) qualifying as a Specialised Investment Fund (SIF).

The Fund operates as a feeder vehicle investing through a Luxembourg Intermediate Fund into a Luxembourg Master Fund, which invests side-by-side with the corresponding U.S. Fund. The broader fund complex includes a Non-Treaty Feeder, a Rated Note Feeder (structured as a Delaware LLC for insurance investors), Comvest ICAV (Irish-domiciled), and an Offshore Master Fund. Harborview Management Company (Lux) S.A. ("Harborview") serves as the AIFM under AIFMD and is authorized by the CSSF.

On balance, while this multi-jurisdictional structure is a common feature of institutional private credit platforms seeking to accommodate a diverse international investor base with varying tax, regulatory, and structural requirements, the wide range of entities across the overall Fund structure unavoidably increases the degree of accounting and operational complexity.

Key Terms

The Fund offers limited partnership interests denominated in USD. The key person provision names Jonathan Hargrove (CEO / Managing Partner) and Patrick Brennan (Partner); if either ceases to be involved, two-thirds of the limited partners may elect to limit new investments. Distributions in kind are permitted under the Fund's governing documents but have not been made in prior vintages.

The Fund is expected to issue side letters, some of which may provide for reduced fees based on the size and timing of the investment.

Fee Structure

The Fund offers investors an election between two carried interest structures: a Fee Bank Performance Fee or a European Waterfall Performance Fee, with the Fee Bank structure as the default. Alpine considers these terms to be within the range of market norms for institutional private credit vehicles.

Organizational expenses are subject to a cap of \$4 million or 0.25% of total commitments. Transaction fees generated by the Manager are offset 100% against the management fee. Allied Asset Holdings, Inc. provides placement agent services, with expenses offset against the management fee.

With respect to expenses, Alpine highlights that system expenses are charged to the Fund. Alpine disagrees with the characterization of system expenses as a fund-level cost, viewing such expenditures as management company overhead that should not be passed through to investors. In addition, research and due diligence travel, broken deal costs, and investment research and data expenses are charged to the Fund. Marketing expenses, compliance consulting, deal origination costs, and management company overhead are borne by the management company.

The Operating Advisory Group and Executive Partners are compensated through a combination of management company and fund/portfolio-level charges depending on the nature of the services rendered.

As a proxy for expected Fund expenses, the Manager provided the audited financial statements for the prior vintage (GCP VI Luxembourg Feeder for the fiscal year ended December 31, 2025), which indicate professional and administration fees of \$745,739.

Corporate Governance

As a Luxembourg SCSp SICAV-RAIF, the Fund does not operate under the supervision of a Board of Directors at the Fund level. The functional equivalent is the General Partner, which is an affiliate of the Manager. As a result, there is no possibility of independent oversight equivalent to what is usually accomplished by a board.

Investment Strategy

The Fund pursues a senior secured direct lending strategy targeting middle-market companies in the United States and Canada with EBITDA of \$10 million to \$50 million. The Manager targets borrowers across healthcare, financial services, business and technology services, industrials, and consumer/retail sectors, encompassing both sponsored (private equity-owned) and non-sponsored borrowers.

Investments are structured as senior secured credit facilities comprising term loans, revolving lines of credit, and delayed draw term loans. The Manager selectively utilizes warrants and minority equity co-investments as part of its investment structures. The Fund is expected to hold 60 to 80 investments over its investment period.

As a reference point, the prior vintage (GCP VI) holds 51 investments (50 unrealized, 1 realized), and GCP V holds 88 investments (62 unrealized, 26 realized).

Chapter Summary

GREEN

Overall, no material issues were identified with respect to the Fund, its legal structure, terms of investment, or fee arrangements. This supports a Green rating for *Fund Structure, Terms & Investor Alignment*. Nonetheless, Alpine highlights that system expenses are charged to the Fund, which Alpine considers to be management company overhead. In addition, the multi-jurisdictional fund structure spanning Luxembourg, Delaware, Irish, and Cayman entities unavoidably increases the degree of accounting and operational complexity. Investors should monitor the level of operating expenses charged through the Fund when audited accounts are available.

Chapter 5

Service Providers, Delegation & Oversight

GREEN

Chapter 5: Service Providers, Delegation & Oversight

Provider Roster

Continental Bank Global Fund Services (Luxembourg) S.a r.l. ("Continental Bank", the "Administrator") has been engaged to provide both administration and depositary services to the Fund. Continental Bank is responsible for portfolio accounting, partnership capital accounting, NAV calculation, and depositary oversight from its Luxembourg offices.

Crestline Fund Administration ("Crestline") serves as the dedicated loan administrator for GCP, with eight staff assigned to the platform. Crestline is responsible for loan-level operations including payment tracking, covenant monitoring, and borrower reporting.

Alpine notes that the Manager utilizes multiple administrators across its product line, with different administrators engaged for the SMA mandates, the structured credit products, and the legacy self-administered accounts. While Alpine has no immediate concerns over such arrangements, Alpine highlights that having multiple fund administrators inherently adds operational complexity for the firm.

The Fund's auditor is Whitfield Young LLP ("WY"). Alpine notes that WY also provides audit and non-audit services to the management company. While this is not uncommon in the private credit space, Alpine highlights the arrangement as it creates a dependency on a single audit firm across both the fund and management company levels.

Pacific Commerce Bank provides banking and credit facility services to the Fund. Atlantic Trust Financial serves as ISDA counterparty for FX hedging purposes. Alpine notes that Atlantic Trust Financial did not respond to Alpine's verification request; this is recorded as a verification exception.

Prescott Valuation Group ("Prescott") has been appointed as external valuation agent, performing semi-annual full portfolio pricing plus ad hoc reviews. Harborview Management Company (Lux) S.A. ("Harborview") serves as the AIFM under AIFMD and is authorized by the CSSF.

Chapter Summary

GREEN

No material issues were identified with respect to the Fund's service provider roster, supporting a Green rating for *Service Providers, Delegation & Oversight*. Alpine notes the use of multiple administrators across the firm's product line and the dual engagement of Whitfield Young LLP as auditor for both the Fund and the management company. In addition, Alpine records a verification exception with respect to Atlantic Trust Financial (ISDA counterparty), which did not respond to Alpine's request to confirm its engagement. Investors are encouraged to monitor these arrangements over time.

Chapter 6

Investment Operations & Portfolio Controls

YELLOW

Chapter 6: Investment Operations & Portfolio Controls

Portfolio Management Systems

The Manager utilizes DealView as its deal management platform for tracking the origination pipeline and investment workflow. Portfolio accounting is maintained on Investran, with Excel used for waterfall calculations. Alpine notes that while Investran is a well-established private capital accounting platform, the use of Excel for waterfall calculations introduces the potential for computational error and version control issues inherent in manual spreadsheets.

Investment Decision Process

Investment decisions are made by the Investment Committee ("IC"). Alpine reiterates that Marco Delgado (CFO / CCO) serves as a member of the Investment Committee. While Marco's participation provides finance and compliance input into investment decisions, Alpine highlights that his dual role as head of compliance and as a member of the IC presents a segregation of duties issue, particularly given that he participates in carried interest. Alpine would prefer to see the compliance function segregated from the investment committee.

Investment Allocation

The Manager has a written investment allocation policy. The Fund invests through a feeder-master structure, with the Luxembourg Master Fund investing side-by-side with the U.S. Fund. Alpine notes that the CCO has oversight over the allocation process. However, given that the CCO also sits on the IC, the allocation process is not subject to fully independent compliance oversight. Investors should monitor this arrangement.

Cash Tracking & Accounting

External to the firm, Continental Bank performs periodic cash and NAV reconciliations. Internally, Crestline performs loan-level cash tracking and reconciliation. The Manager maintains internal oversight over cash balances and movements.

Cash Controls

The Manager maintains a dual-signature policy for wire transfers. However, Alpine highlights several limitations in the cash control environment. The Administrator does not control banking accounts for investor capital activity and is not involved in treasury operations. Non-trading expense payments are not under Administrator control. Furthermore, transfers above threshold are not subject to a verification callback.

Alpine would prefer to see the Administrator incorporated into the wire transfer process for all capital activities and expense payments, and for all above-threshold transfers to be subject to independent callback verification. In partial mitigation, Alpine notes that the dual-signature policy requires two authorized signatories for wire release, which provides a baseline level of control over cash movements. In further mitigation, Continental Bank performs periodic cash reconciliations which would detect unauthorized cash movements.

Chapter Summary

YELLOW

Alpine highlights that the Administrator provides limited oversight over cash operations: Continental Bank does not control banking accounts, is not involved in treasury operations, and is excluded from the wire transfer verification process. In addition, transfers above threshold are not subject to verification callback. These observations, combined with the CFO/CCO's participation on the Investment Committee (which limits the independence of allocation oversight), drive a Yellow rating for *Investment Operations & Portfolio Controls*. In partial mitigation, the Manager maintains a dual-signature policy for wire transfers.

Chapter 7

Valuation, Asset Existence & Investor Reporting

GREEN

Chapter 7: Valuation, Asset Existence & Investor Reporting

Valuation Controls

Alpine's starting point for a discussion of the Fund's pricing procedures is to recognize that, as with most closed-ended private credit structures, (i) the Fund is a finite life, capital commitment vehicle; and (ii) the General Partner receives a carried interest only upon a realization event. Valuations are provided to investors on a quarterly basis for indicative purposes, with no contributions or redemptions of investor capital taking place based on those valuations subsequent to the initial commitment period. Given these characteristics, investors will have less sensitivity to valuation issues in the Fund than in an open-ended vehicle allowing capital transactions based upon estimated net asset values.

From a pricing perspective, the portfolio introduces valuation risk as it is expected to be comprised of predominantly Level 3 assets (senior secured loans to private middle-market companies).

The Manager has a written valuation policy which was provided to Alpine for review in soft copy. The policy is reasonably detailed and encompasses the instruments expected to be held in the portfolio.

Prescott Valuation Group ("Prescott") has been appointed as external valuation agent, performing semi-annual full portfolio pricing plus ad hoc reviews as requested by the Manager. Alpine considers the appointment of an independent valuation agent to be a constructive control, as it provides for a superior segregation of duties in the valuation process, additional independence, and further control confidence over valuation consistency and computational accuracy.

However, Alpine highlights two limitations in the current valuation framework. First, Prescott's reports are not updated at each NAV date; the semi-annual cadence means that quarterly NAVs are produced using internally generated pricing without the benefit of an independent external check. Alpine would prefer that the external valuation agent provide updated reports at each NAV date. Second, Prescott's reports are sent to the Manager rather than directly to the Administrator. Alpine would prefer that the valuation agent provide its reports directly to Continental Bank to ensure an independent flow of pricing information.

Alpine notes that the valuation committee is not comprised of a majority of non-investment professionals. Alpine would prefer to see the committee reconstituted to remove any appearance of conflicts of interest over the involvement of investment professionals in the pricing process.

Given the allocation to Level 3 assets, it is also notable that the Administrator accepts pricing from the Manager without conducting independent verification procedures. Alpine would prefer to see the Administrator performing basic verification checks on pricing inputs at each NAV date.

Asset Existence & Verification

The Fund's assets are expected to be evidenced by private loan agreements that are not subject to traditional custody safekeeping. Continental Bank, in its capacity as Depositary, has oversight over the safekeeping of financial instruments and verification of ownership. Crestline, as loan administrator, maintains detailed records of loan positions including payment schedules, covenant compliance, and borrower reporting.

From an existence perspective, several parties are involved in each transaction to ensure all investments are genuine. As such, any attempt to create a fictitious asset would require collusion among a number of professionals across the Manager, Administrator, loan administrator, legal counsel, and auditor. Furthermore, Alpine understands that the auditor independently tests the portfolio at year-end for existence.

Investor Reporting

The Administrator is responsible for issuing the Fund's quarterly NAV, subject to review by the Manager. Crestline provides loan-level reporting to support the NAV process. All partnership capital accounting records are maintained by the Administrator using Investran. Carried interest waterfall calculations are performed in Excel; given the inherent complexity of the waterfall calculation and the potential for error associated with maintaining manual spreadsheets, Alpine would prefer to see a more robust solution for this aspect of the NAV calculation.

Financial Reporting Controls

The Fund's financial statements are audited by Whitfield Young LLP under Luxembourg GAAP / IFRS as applicable. Alpine notes that WY also provides audit and non-audit services to the management company, which Alpine considers to be a point of monitoring. Investors should review the audited accounts when available to identify any presentational or footnote disclosure issues.

Chapter Summary

GREEN

Internal controls over the pricing environment appear adequate: the Manager has implemented a satisfactory valuation framework which includes the appointment of Prescott Valuation Group as independent external valuation agent, performing semi-annual full portfolio pricing. Alpine also reiterates that the closed-ended structure of the investment vehicle alleviates the risk of deliberate mispricing. The combination of these factors supports a Green rating for *Valuation, Asset Existence & Investor Reporting*. Nevertheless, Alpine highlights that Prescott's reports are not updated at each NAV date and are sent to the Manager rather than directly to the Administrator. In addition, the valuation committee is not comprised of a majority of non-investment professionals, and the Administrator accepts pricing without independent verification.

ALPINE

Chapter 8

Manager Transparency & LP Communications

GREEN

Chapter 8: Manager Transparency & LP Communications

Diligence Process Cooperation

The Manager was responsive and forthcoming throughout the due diligence process, providing requested documents promptly and making staff available for follow-up questions. There were no instances of evasion, delayed responses, or attempts to restrict the scope of Alpine's review.

Administrator Cooperation

Continental Bank was cooperative and provided independent confirmation of key operational arrangements via conference call. Continental Bank independently verified service provider engagements, described its operational procedures in detail, and confirmed cash control and wire authorization processes. Crestline was similarly cooperative and confirmed its role as loan administrator during a separate conference call.

Disclosure Quality

The Manager proactively disclosed the SEC examination history and findings, the Operating Advisory Group arrangement and related remediation, the Allied Asset Holdings minority investment, the departure of Tyler Reed, and the planned hiring of a dedicated CCO. This level of candor is constructive and indicates a willingness to address operational gaps transparently.

Chapter Summary

GREEN

No issues were noted with respect to transparency during the due diligence process, supporting a Green rating for *Manager Transparency & LP Communications*.

Reference Data

1. Manager, Ownership & Governance

Field	Value
Manager name	Granite Credit Advisors (Luxembourg), LLC
Parent entity	Granite Capital Advisors, LLC (d/b/a Granite Credit Partners "GCP")
Ultimate parent	Granite Group Holdings LP ("Granite Partners" or "Granite")
Date of commencement of operations	2002 (PE); 2008 (direct lending); 2019 (rebranded GCP)
Manager legal structure	Limited Liability Company (Luxembourg)
Manager is publicly traded	No (20% minority held by Allied Asset Holdings, Inc. (NYSE: ALH))
Primary location	West Palm Beach (FL)
Additional offices	Chicago (IL), New York (NY)

Principals

Jonathan Hargrove, CEO / Managing Partner (>50% equity)

Source: Firm Materials | As of 2025-06-30

Jonathan Hargrove founded Granite in 2002 as a private equity firm focused on middle-market transactions. Prior to founding Granite, Jonathan co-founded Meridian Associates, LP, an investment bank advising middle-market companies. Jonathan launched a dedicated direct lending strategy in 2008 and rebranded the credit platform as Granite Credit Partners in 2019. Jonathan holds a 10-year employment agreement entered into as part of the 2022 Allied Asset Holdings transaction.

Marco Delgado, CFO / CCO

Source: Firm Materials | As of 2025-06-30

Marco Delgado serves as Chief Financial Officer and Chief Compliance Officer. Marco sits on the Investment Committee and participates in carried interest. David Steinberg (Deputy CCO / General Counsel) supports the compliance function.

Assets Under Management

Field	Value
AUM report date	June 30, 2025

Field	Value
Total AUM (including uncalled capital)	\$9.65 billion
Uncalled capital commitments	\$3.06 billion
RAUM (reported to SEC)	\$4.34 billion (as at December 31, 2024)
Manager offers regulated product structures	Yes (RAIF, ICAV)
Manager runs separately managed accounts ("SMA")	Yes (6 mandates; \$1.02B AUM; minimum \$250M; different service providers from commingled)

Ownership & Insider Investment

Field	Value
Internal investors	13 Partners own 80%; Jonathan Hargrove >50% equity
External investor	Allied Asset Holdings, Inc. (NYSE: ALH) — 20% minority (acquired early 2022)
Specific ownership percentages	Not disclosed (limitation)
Controlling equity interest	Yes (Jonathan Hargrove)
Buyback / sunset provisions	None
Employment agreement	Jonathan Hargrove — 10-year agreement (part of ALH deal)
Insider investment (committed)	\$588.8 million (6.2% of total commitments, active funds)
GP commitment mechanism	100% cash funded
Employee co-investment vehicle	GRGH Investors LLC (PE side only; below VP level; up to \$30K per investment; pari passu)

Human Resources

Field	Value
Total headcount	116
Key departures (2025)	Tyler Reed (Partner, departed 2025, amicable)
Recent hires	Nathan Walsh (MD, March 2023); James Hartley (MD, May 2023); Richard Kaplan (Partner, Jan 2025); Benjamin Cole (MD/Head of Capital Markets, April 2025); Ryan Torres (VP IT, June 2025)

Field	Value
Operating Advisory Group	Alex Park (MD) + 10 staff (consulting to Granite and portfolio companies exclusively)
Executive Partners	15+ external professionals (deal origination, board seats)
PEO / co-employment	TriNet
Background check provider	ClearView Screening
Manager uses 3rd party consultants	Yes (OAG; Executive Partners)

CONFIDENTIAL

2. Legal, Regulatory & Compliance

Regulatory Oversight

Field	Value
Securities and Exchange Commission	Registered Investment Adviser (since March 28, 2014)
AIFM	Harborview Management Company (Lux) S.A. (authorized by CSSF)
SEC examination history	Most recent: June 1, 2023 — completed Feb 2024; one finding (OAG disclosure); remediated. Prior: 2016 — 3 findings (valuation policy, annual review); remediated
Regulatory sanctions (past ten years)	No

Compliance Infrastructure and Policies

Field	Value
Compliance officer	Marco Delgado (CFO / CCO; also on IC; participates in carry)
Deputy compliance officer	David Steinberg (Deputy CCO / General Counsel)
Dedicated CCO	No (plans to hire within 12 months)
Compliance consultant	Pacific Compliance Group ("PCG") — periodic mock audits (most recent 2025, no material findings)
Manager has a compliance manual	Received (dated September 1, 2025)
Annual compliance training	Yes (PCG for below MD; Morrison & Sterling LLP for MD and above)
Personal trading policy	Yes (CompliTrack / MCO; pre-clearance for IPOs and private placements only; no minimum holding period)
Brokerage statements received by compliance	Yes (via direct data feeds)
Restricted list maintained	Yes (69 names)

Claims, Actions, and Conflicts

Field	Value
Manager / affiliate / employee subject of civil or criminal litigation in past ten years	Yes — ordinary course PE side only; no direct lending litigation; no material claims
D&O / E&O insurance	\$40 million coverage

Field	Value
Expert network usage	Yes — InsightBridge and Alderson Research; 2-6 calls/month; no pre-clearance; no blackout; not documented; ~25% chaperoned; compliance reviews retroactively

CONFIDENTIAL

3. Technology, Cybersecurity & Business Resilience

Information Technology

Field	Value
Internal IT lead	Ryan Torres (VP IT, hired June 2025)
Technology consultant	Vertex IT Solutions
Cybersecurity training provider	Lakeshore Security
Penetration testing provider	FireLine Testing
Managed cybersecurity provider	Sentinel CyberShield (replaced Watchpoint Cybersecurity, Dec 2023)
IT infrastructure model	Cloud-based (Azure migration June 2025; Office 365, OneDrive, SharePoint)

Cybersecurity Controls

Field	Value
Manager has a cybersecurity policy	Received (NIST-aligned Written Information Security Program)
Multi-factor authentication	Yes
Endpoint data loss prevention	Yes
Network penetration testing	Yes (FireLine Testing; annual; no material findings)
Cybersecurity awareness training	Yes (Lakeshore Security; includes phishing simulations)

Disaster Recovery / Business Interruption

Field	Value
Manager has a business continuity plan	Yes (being updated for Azure cloud migration)
BCP update target	April 2026
Remote work capability	Yes (cloud-based infrastructure with inherent redundancy)

4. Fund Structure, Terms & Investor Alignment

Corporate Structure

Field	Value
Fund name	Granite Credit Partners VII (Luxembourg) Feeder SCSp SICAV-RAIF
Domicile	Luxembourg
Legal structure	SCSp SICAV-RAIF
Date of formation	September 5, 2025
Date of commencement of operations	December 13, 2025
Asset class	Private Credit — Direct Lending
Type of structure	Feeder → Luxembourg Intermediate Fund → Luxembourg Master Fund (side-by-side with U.S. Fund)
Related vehicles	Non-Treaty Feeder; Rated Note Feeder (Delaware LLC); Comvest ICAV (Irish); Offshore Master Fund
AIFM	Harborview Management Company (Lux) S.A. (CSSF authorized)
Board at Fund level	No

Terms

Field	Value
LP interests denominated in	USD
Initial closing	December 13, 2025
Intermediate closing	April 1, 2026
Current Fund raise	\$435 million (as at Q4 2025)
Target Fund raise	\$2.5 billion
Key person provision	Jonathan Hargrove and Patrick Brennan; 2/3 LPs can limit new investments if either ceases
Distributions in kind	Permitted (not made in prior vintages)
Side letters	Expected (some with reduced fees based on size/timing)

Fee Structure

Field	Value
Carried interest structure	Fee Bank Performance Fee OR European Waterfall Performance Fee (investor election; default Fee Bank)
Organizational expenses cap	\$4 million or 0.25% of commitments
Transaction fee offset	100% against management fee
Placement agent	Allied Asset Holdings, Inc. (expenses offset against management fee)
System expenses	Charged to Fund (Alpine disagrees — manager overhead)
Research / due diligence travel	Charged to Fund
Broken deal costs	Charged to Fund
Investment research / data expenses	Charged to Fund
Marketing / compliance consulting / deal origination / mgmt co overhead	Borne by management company

Investment Strategy

Field	Value
Strategy	Private Credit — Direct Lending
Sub strategy	Senior Secured Direct Lending
Target borrower profile	Middle-market U.S./Canada companies (\$10-50M EBITDA)
Sectors	Healthcare, financial services, business/tech services, industrials, consumer/retail
Borrower types	Sponsored (PE-owned) and non-sponsored
Investment structures	Term loans + revolving lines + delayed draw; some warrants/minority equity co-investments
Target portfolio size	60-80 investments
Prior vintage (GCP VI)	51 investments (50 unrealized, 1 realized)
Prior vintage (GCP V)	88 investments (62 unrealized, 26 realized)

5. Service Providers, Delegation & Oversight

Administrator / Depositary

Field	Value
Administrator	Continental Bank Global Fund Services (Luxembourg) S.a r.l.
Depositary	Continental Bank Global Fund Services (Luxembourg) S.a r.l.
Accounting platform	Investran

Loan Administrator

Field	Value
Loan administrator	Crestline Fund Administration
Dedicated staff	8 professionals assigned to GCP

Auditor

Field	Value
Auditor	Whitfield Young LLP ("WY")
Auditor also provides services to management company	Yes (audit and non-audit)

Other Providers

Field	Value
Banking / credit facility	Pacific Commerce Bank
ISDA counterparty (FX hedging)	Atlantic Trust Financial (verification exception — did not respond)
External valuation agent	Prescott Valuation Group (semi-annual full portfolio pricing + ad hoc)
AIFM	Harborview Management Company (Lux) S.A.
Compliance consultant	Pacific Compliance Group
IT consultant	Vertex IT Solutions
Cybersecurity training	Lakeshore Security
Penetration testing	FireLine Testing

Field	Value
Managed cybersecurity	Sentinel CyberShield
Background checks	ClearView Screening
PEO / co-employment	TriNet
Personal trading monitoring	CompliTrack (MCO)

CONFIDENTIAL

6. Investment Operations & Portfolio Controls

Portfolio Management

Field	Value
Deal management system	DealView
Portfolio accounting system	Investran + Excel (waterfall)

Investment Process

Field	Value
Investment Committee	Includes Marco Delgado (CFO / CCO) — segregation concern
Investment allocation policy	Written
CCO on Investment Committee	Yes (segregation of duties concern)

Cash & Accounting

Field	Value
Administrator accounting platform	Investran
Administrator cash reconciliation	Periodic
Loan administrator cash tracking	Crestline (loan-level)

Asset Transfers

Field	Value
Banking counterparty	Pacific Commerce Bank
Wire authorization	Dual signature policy
Administrator involvement in treasury	No — Continental Bank excluded from wire transfer process
Administrator controls banking accounts	No
Non-trading expense payments under Admin control	No
Verification callback (above threshold)	No

7. Valuation, Asset Existence & Investor Reporting

Valuation Controls

Field	Value
Valuation policy	Received
External valuation agent	Prescott Valuation Group (semi-annual full portfolio pricing + ad hoc)
Valuation agent reports updated at each NAV date	No (semi-annual only)
Valuation agent reports sent to	Manager (not directly to Administrator)
Valuation committee	Not majority non-investment professionals
Administrator role in valuation	Accepts Manager pricing; no independent verification

Investor Reporting

Field	Value
Accounting standard	Luxembourg GAAP / IFRS as applicable
Waterfall calculation method	Excel
Prior vintage expenses (GCP VI Lux Feeder FYE Dec 31, 2025)	Professional/admin fees \$745,739

8. Manager Transparency & LP Communications

Field	Value
Manager cooperation during diligence	Full cooperation
Document provision	Prompt, no delays
Staff availability for follow-up	Yes
Evasion or scope restriction	None
Administrator cooperation	Full cooperation (Continental Bank and Crestline; independent confirmation provided)
Proactive disclosure of operational gaps	Yes (SEC exam history; OAG arrangement; ALH investment; Tyler Reed departure; planned CCO hire)
